CONCLUSIONS AND FUTURE PROGRAMS

A PRELIMINARY DRAFT OF THE PAPERS IS AVAILABLE AT THE LINK
<https://www.dropbox.com/sh/iizg145tgp5ntow/AAB2MoMSkWzgGY3JbUlcgGNda?dl=0>

AIMS OF THE WEBFORUM

1. Illustrate the crucial role within the European Recovery Program of “A New Industrial Strategy”, as indicated in the various previous publications of the Group “Growth Investments and Territory”.
2. Illustrate the differences between the policy indications by regional and industrial economics and related disciplines, developed in the last five decades according to the modern paradigms of neo-institutional economics and neo-Schumpeterian economics, with respect to the static and individualistic approach adopted by the orthodox neoclassical and neoliberal theories of the mainstream economists.
3. Promote a tight personal interaction between the well-known international speakers invited at the WebForum, promote an advancement of economic theory and a reciprocal consensus on selected policy proposals between the experts participating at the WebForum in order to respond to the challenges of the recent Covid-19 crisis.
4. Illustrate these new modern economic policies to the wide public of citizens, the new generations and the policy makers, overcoming the traditional orthodox neoliberal receipts advocated by the major mass media and illustrate the strategic role of local and regional governments in national and European economic policies
